

Savannah River Site Small Business Initiative

Craig Armstrong, Director
Office of Contracts Management
Department of Energy, Savannah River Operations Office

SRS M&O Contract Competition

- SRS is in the process of executing its previously published acquisition strategy for follow-on contracts to replace the current M&O contract with WSRC
- Multiple contract strategy will replace single M&O contract strategy
 - Basic Site M&O Contract (subject of this conference)
 - Draft RFP was released on October 31, 2006 for comment
 - Liquid Waste Processing Contract
 - Currently in the RFP development stage
 - Small business “break-out” acquisitions over the next 3 years
 - Using existing Indefinite Delivery, Indefinite Quantity contracts
 - New small business set-aside contracts
 - Scopes for these projects are currently in the development stages

SRS Small Business Initiative

- **The Challenge: Increase direct DOE contracts to small business**
 - Historical dependence on M&O subcontract small business performance is no longer acceptable

SRS Small Business Initiative

- DOE examined the current M&O contract's work breakdown structure to identify activities that were suitable for direct break-out awards to small business
- **Criteria for break-out:**
 - Mission performance by either contractor would not be affected by the activity
 - Most small business activities should be outside the "nuclear fences"
 - There must be at least two small business entities capable of performing the service
 - Activities needed to be capable of being grouped together for ease of contract management and administration

SRS Small Business Initiative

- DOE-SR managers identified 29 activities/ functions to be evaluated for potential small business set aside
 - These 29 activities were consolidated into five functional contract areas
- The Plan: Break out two functions in each Fiscal Year 2007 and 2008 with the remaining function in Fiscal Year 2009

SRS Small Business Initiative

- **FY07:**
 - **Transportation & Mechanical**
 - Emergency Specialty Equipment Services
 - Transportation Services (non-nuclear)
 - Fuel Management
 - Fire Protection Engineering, Fire Test/Maintenance (outside nuclear fence)
 - **Health & Human Services**
